CONWAY—EDWARDS

A very pretty wedding took place on Thursday, September 6th in the United Church, when Miss Alberta Edwards, eldest daughter of Mr and Mrs M. A. McKenzie of Mirror, and Mr. Howard Conway only son of Mr and Mrs M. Conway of Alberta Beach, were united in holy matrimony. Rev. R. T. Harden officiating.

The bride looked lovely in a gown of white georgette and satin over which was draped the bridal veil of silk net. The bride's bouquet was of Ophelia roses and lilies of the valley. The bride entered the church on the arm of her father, to the strains of Lohengrin's wed ding march played by Mrs Baugh.

Mrs Elsie Edwards sister of the bride and Miss Grace Fluke of Big Valley, were the bridesmaids. Miss Edwards was attractively dressed in pink crepe de chene and Miss Fluke in blue georgette trimmed with silver. Both young ladies carried a lovely bouquet of pink sweet peas. The groom's sister, Mrs E. Palmer and her husband of Edmonton, and Mr and Mrs Conway of Alberta Beach, were present at the wedding. Mr Palmer assisting groom. The groom's present to the bridesmaids were vanity cases while the best man received a set of gold cuff links, and Mrs Baugh a set of cut glass salt and pepper shakers.

After the wedding a reception was given at the home of the bride for the intimate friends of the family. Mr and Mrs Conway left for their honeymoon at the coast, Friday afternoon, Mr and Mrs Conway and Mr and Mrs Palmer accompanied them as far as Edmonton.

Upon their return the young couple will make their home in Mirror, and their many friends wish them happiness and prosperity in the years to come.

NOTICE

There will be positively no hunting allowed on the E. half of 20-40 22.

R. W. MacDonnell.

Board of Trade Meeting

The regular meeting of the Board of Trade was held Friday evening after the usual banquet in the W.L. building.

Mr Kerr gave a report of the interview with the minister of public works in connection with the proposed Stettler highway stating that they had been informed the road would be put through were best and least expensive. The members of the delegation each gave their opinions as to the possibilities of the road coming through here and the general feeling was that our chances were about 50-50. It was however, decided to send a letter of appreciation to the minister for his reception to the delegation.

The sign committee reported that the signs were nearly all put up.

Mrs Estell informed the meeting that there was a gravel pit about a mile out of town which be very advantageous as to the building of the highway. Messrs Estell, Roper and McDonald were appointed to make an investigation of the pit.

Some small accounts were passed and it also a portion of the delegates' expenses.

(Continued on back page)

Local News

Mr and Mrs Geo. Jackson and Mr and Mrs L. L. Cassidy motored to Stettler last week.

Owing to a fire in his wheat field last year, caused by lightning, Mr Macdonnell is prohibiting shooting on his property.

Born to Mr and Mrs A. C. McNair, on Thursday, Sept. 6th a daughter.

Mr and Mrs Fred McDonald and daughter, Mildred motored to Edmonton on Wednesday accompanied by Miss Rosemary Bromley. Mildred was taken to Doctor E. Allin to undergo treatment.

Three threshing rigs were working in Brazeau country on the 6th. Cutting is well underway in this district and the grain is in very good condition, with a continuation of the fine weather we have had, a large amount of grain will be threshed in shortly.

We would like to point out the importance of supporting the bank in town. The manager states that the business is very poor, especially of those who neglect to give their support. We have established a permanent old man branch here. It is the same old man what we have outgrown, we want only, and what we have got we fail to appreciate, without a bank we are severely handicapped and unless it is supported a great deal more than it is we are going to lose it and also the prospects of securing the privilege again.

Mr Jim McKirky of Vancouver an old time resident of this district, and once postmaster, is visiting with Mr and Mrs M. H. Olson.

Mrs Haggerty has returned from a two weeks vacation to Edmonton.

Mr William Hadden moved into his new house on Monday.

The shooting season commences Saturday the 15th.

Tom Mix in 'Tumbling River' at the Grand Theatre on Saturday September the 15th.

Frank Smathers motored to Pine Lake on Sunday last with his new Ford.

Mrs R. Harris and Mrs L. Howard, are visiting at the home of their mother, Mrs H. L. Brewster.

Miss Leona Olson is taking her grade 12 at Stettler high.

PIANO TUNING — Gavin Spence and Robert Moffat will be in Mirror early next week to complete their work undertaken through absence of patrons. Phone orders to the Journal Office.

Mrs Elsie Woolgar has been assisting at the Imperial hotel in the absence of Mrs Haggerty. The Crown Lumber are erecting a large coal shed to take care of the demand for coal this winter, which Mr Smith the manager, expects will be very busy. Mr L. S. Cassidy has been awarded the contract.

Mac Steele is reported to be doing well after the operation on his eye in Edmonton, and will be home again soon.

The W. L. Convention was held on Wednesday, with a luncheon at noon, as the event was too late for this publication a full report will appear in next week's paper.

Casein Made From Skimmed Milk Can Be Profitably Used For Manufacture Of Many Articles

The products of Canada's dairy factories include butter, cheese, cream, ice cream, evaporated and condensed milk, milk powder, etc., an item seldom heard of, called casein. Of the three thousand odd dairy factories in the Dominion, the most important manufacture the substances, and yet there is a large, largely market in the United States, which in 1926, imported 20,000,000 pounds mostly from Argentina. Canada's exports to the United States last year were only 287,000 pounds. Canadian dairy factories can produce casein of high quality and there is no particular difficulty in manufacture. One of the chief obstacles to a general trade in casein is the fact that the Natural Resources Intelligence Service of the Department of the Interior, is that Canadian manufacturers or casein have not yet seen their way clear to guarantee deliveries in the quantities desired.

Casein is interesting because it represents the recovery of a by-product in dairy factories, because Canada imports considerable quantities and has export opportunities, and because it is a valuable product in uses in industry and in the arts.

Casein is generally manufactured from skimmed milk. Of course skimmed milk has other important uses in the production of skin milk powder, condensed milk, skim milk cheese and for feeding livestock. The use of skimmed milk for the manufacture of casein is mainly advanced when circumstances are such that cannot be applied to more profitable use. It is known that large quantities of skimmed milk are going to waste in many dairy factories and if this waste could be converted into casein it would represent a large and efficient utilization of raw materials and of benefit to Canadian industry and trade.

Casein is generally prepared from sweet skimmed milk. It is the casein which is added to the powdered or of an acid and then dried and pressed. Its uses are legion, though in Canada at present it is principally used in the coating and sizing of paper and also in the manufacture of certain types of insulation, greater furniture and veneer work. In Europe, however, casein is further converted into a plastic or hardened substance resembling horn and which can be used in the manufacture of useful articles of commerce. There is no manufacturer of casein plastics in Canada. If there was we would find that skimmed milk was being used for the manufacture of certain types of insulation, electric fittings, cigar and cigarette holders, chenille, dominoes and dice, backs to hair and clothes brushes, combs, door knobs, and handles for umbrellas and parasols, piano keys, buttons, teeth, hairpins, needles and inexpensive jewellery and ornaments. There are only a very few of the items which can be made from casein plastic which is a non-inflammable and highly elastic material which can be painted, turned, glued and moulded into any shape desired. It is an inexpensive substitute for many natural materials, often rare and costly, such as Chinese jade, lapis lazuli, ivory, ebony, amber, tortoise shell, coral, diamonds, etc. Effects can be produced with casein plastic, as it can be produced perfectly transparent or dyed in a variety of single and multicolored colors.

At present, however, all of casein still imported into Canada, the increasing exports and possibilities of establishing a ready large export market, the opportunity for increasing the output of casein gives casein producers as well as importers a strong incentive. During casein plastic products, all points to an excellent outlook for the manufacture of more casein in Canada.

Farm Well Water

Only 34 Per Cent Of Wells Tested Were Found To Contain Pure Water

Of the samples of water from farmers' wells analyzed last year by the Department of Agriculture, Farm Bureau Division, of the Ministry of Agriculture, 34 per cent. were pure and wholesome, 18 per cent. suspicious and probably dangerous, 24 per cent. seriously polluted, and 24 per cent. saline.

Concerning the report of this division may be had an application to the Publications Branch, Department of Agriculture, Ottawa. The report calls attention to the conditions regarding drinking water in various parts of the country. A minimum safe distance from a possible contaminating source at which to locate a well is given to be about 15 feet.

The report contains much valuable information on soils, fertilizers, agriculture and many other uses of investigation.

The Balance Of Nature

Flowers, Butterflies, Elephants & Frogs

An important instance of the balance of nature is in the fact that most flowers are dependent for pollination on the visits of appropriate insects. If certain insects fail, then the crop of seeds suffer, if they keep their appointment the crop succeeds.

This varies somewhat on the weather, but generally, disease, pests result in enough to offset the efforts of the flowers.

Several hundreds of flower species, too, depend not upon insects, but upon the visits of honeybirds, hummingbirds, and sun-birds, and if these are killed or driven away will not pollinate the flowers.

There is no doubt that the lady who had him think his

PASSING OF PROMINENT JURIST

One of Canada's outstanding jurists and a prominent figure in the political field, Mr. Justice Ernest Roy, Justice of the superior court, died suddenly recently at St. Michael, Belleglace, where he was spending his vacation, in his 57th year. He has travelled extensively across Canada, and his services will be much regretted by friends throughout the Dominion.

Have Wonderful Memory

Thinking Power Of Elephant Is Almost Human

The almost human intelligence of elephants has often been narrated, and the following instance adds to one's admiration of the thinking power of these mighty creatures.

There was an elephant at the Zoo while some six years ago in the Simley Chronicle there had a difference with his keeper. This big chap formed a great attachment to a lady elephant in the spring of the year and, until he had to be fastened up for a day or two, until he became more amiable to reason.

Of course, these little affairs blow over, and, within a few days, I am certain, says the writer, that old Bindy, as he was called, for his biscuits and bones that he was about the lady who had him think his

days before.

Bindy collected his biscuits as usual, but studiously avoided the coins given him, which were his sole perquisites. When at last a persistent visitor insisted upon putting a copper into his trunk, he deliberately handed the copper to the keeper of another elephant who was passing.

Never again did Bindy give his keeper a penny. He had quite got over his love affair, but he never forgot that it was the keeper who frustrated him—and at least I suppose so—he made him pay for it.

To Reconstruct China

The London Daily Express says that a syndicate of manufacturers with interests in China, in addition to a great number of British industry and trade, has been formed to reconstruct parts of the war-ravaged areas of China. Contracts about to be signed between the syndicate and the Chinese government will give the total capital of \$10,000,000 to the newspaper.

Many a fellow who's a big noise at the office is only a little squeak at home.

Men still die with their boots on but usually one boot is on the accelerator.

Growth Has Been Rapid

Development Of Prairie Provinces Has Important Bearing On Western Canada

The growth of the provinces of Alberta and Saskatchewan since they were brought into being by the famous "autonomy bills" on September 1, twenty-three years ago, is a feature of the history of Canada. It has given us many pleasant pastimes to our own people and, because of its important bearing upon the world economic situation, attract the attention of students in every quarter of the globe.

When the Dominion created the two new provinces, the area affected had fewer than half a million people. The population has increased to one and a half millions, or 200 per cent, and agricultural revenue has increased to \$60 million dollars worth, and the gross agricultural revenue to three billion dollars, or to more than one-third of the total for the whole Dominion. The rural population of the two provinces has declined, but actual numbers in the urban population has increased 10 fold.

The number of manufacturing plants and their output have multiplied by fifteen times, and the value of the farm products has grown to the half million mark.

Settlers have flocked into Canada's prairie provinces because these provinces offered better prospects of gain than any other part of the continent, and this was to be found in Europe and many parts of Ontario and the United States.

The bringing under cultivation of new wheat lands in the west during the last twenty years has made Canada the greatest wheat producer in the country in the world.

The political aspects of western development are important. The representation in the house of commons of the districts to the west of Ontario has increased from 20 to 29, and is now greater than that of Quebec, the largest and longest settled province. This shifting of the balance of power has modified public opinion in regard to the tariff, public works and other matters, so as to do great that politicians have been slow to realize.

Nor are the prairie provinces neutral in this respect. Most of our fertile lands are unused in their portion that is being cultivated. The exploitation of mineral wealth in their northern hinterlands will add to their prosperity. The coming of those days will bring a stimulus to the well-being of every part of Canada.

Remains Financial Centre

London Still Leads In Regard To Banking

Despite all reports to the contrary, London still is, and will be for some time to come, the financial centre of the world, according to Charles Cambie, manager of the London, England, branch of the Canadian Bank of Commerce. Mr. Cambie is very optimistic in regard to business and financial conditions in Great Britain, and he is in a position to be well informed on these topics.

In referring to London as the banking centre, Mr. Cambie said that he did not mean that there was no banking in Canada, but that where, but merely speaking from the banking standpoint it is the leader.

Although there are many people in London who are not in a position to be well informed on these topics.

"In referring to London as the

banking centre, Mr. Cambie said that he did not mean that there was

no banking in Canada, but that

A CONSISTENT WINNER

If there is anything in a name "Victor," the prize horse of the Canadian National Express, at Winnipeg, has proved it. Entered at a number of shows and fairs in Western Canada, "Victor" has scored an impressive list of triumphs in competition with the best horses of his type in the west. His record is as follows:

1926—The silver cup at the Winnipeg Horse Show, 1928—Third first at Carman Fair, July 2; Livestock, mare or gelding in harness class; road class; trotters or pacers.

1927—Indoor Show, Rehabilitation, July 9-11; 1st in roadster class; 1st in single delivery class; 2nd in heavy harness class; 2nd in heat harness horse class. In these events he beat a horse which cost over \$2,000.

Saskatoons 1st, best equipped horse; 2nd, light delivery; 2nd, heavy

delivery; 3rd, best road horse; 4th, heavy harness horse.

Will Erect Cairn Near Banff As An Historical Reminder Of The Work Of Empire Builders

Cull Potatoes For Poultry Fattening

Results Of A Series Of Experiments Are Given

Potatoes when available make an excellent fattening feed, and when cut potatoes are fed are a source of protein and energy to chickens. This is the finding after a series of experiments conducted by the Experimental Farm Poultry Division. Hare Hawk and White Leghorn capons were used in the experiment, one lot being fed corn meal and the other lots potatoes.

It was noticeable that gains per bird were greater for the Barred Rock, and also for the birds on corn meal. The same may be said of the Barred Rock, and the Cornish hen, but the Leghorns showed a greater percentage gain than the Barred Rock. The same amount of feed was consumed by each of the two lots. Over 80 per cent of the Barred Rock flocks fed corn meal were fatter than the corn meal fed. This also in spite of the fact that the corn meal fed birds made slightly the greater weight.

The results of this experiment do not indicate that potatoes are superior to corn meal, except from the standpoints of cost and convenience. It is recommended that potatoes when available make an excellent fattening feed. The potato fed birds made the most attractive dressed fowl, flavour, as judged by persons who tested capons fed on both feeds, and considered to be superior to the potato fed fowls in every case.

The results of this experiment do not indicate that potatoes are superior to corn meal, except from the standpoints of cost and convenience. It is recommended that potatoes when available make an excellent fattening feed. The potato fed birds made the most attractive dressed fowl, flavour, as judged by persons who tested capons fed on both feeds, and considered to be superior to the potato fed fowls in every case.

CUT PLUG
SMOKING TOBACCO
IN PACKAGES AND $\frac{1}{4}$ LB. TINS.
A mixture of very fragrant and mild tobaccos.

A Real Menace

Summer is on the way. The nights will soon be sleepy and chill, and if we have not been careful to take care of our health with a little surplus of energy during the long sunshiny days, we may be disgruntled to find ourselves with a developing common cold.

So declares the Canadian Red Cross magazine in discussing what it characterizes as a real menace in this country. Coryza is the official name of the common cold, but the name is not very indicative of the nastiness of the disease at all times. Coryza is a real menace. There is no other affliction that so universally causes discomfort or so great a loss of time for workers, business man, and school child.

A lowering of vitality means a slow-down in usefulness or production, and time lost in the busy age is a money loss somewhere or somehow, to someone. Remembering, however, that a nation's health is a nation's wealth, we're ready to think twice.

The real menace of a cold is its possible bad after-effect on the individual. As it is caused by varieties of bacteria very closely allied to those responsible for the pneumonias, for bronchitis, laryngitis, and possibly catarrh, it often leaves in its wake damages that are permanent.

We can easily "catching" cold, we speak correctly, if by "catching" we mean getting it from the other fellow. About ninety per cent of our colds come from him.

Very rarely one may develop his own cold, for these germs probably are ever-present in the nose and throat and will multiply and thrive should the vitality of the host be sufficiently lowered to furnish a good culture ground for them.

This may be effectively accomplished by avoiding fresh air and sunshine, by loss of sleep, by over-fatigue, or by living in over-heated rooms. Insufficient, improper, or excessive food or clothing assists greatly.

But for the vast majority of our colds, we may blame close contact with our neighbor who coughs, sneezes, and spits, and uses his handkerchief without saying "Excuse me!"

Ignorance of man-made hazards means one: ignorance or disregard of the laws of health eventually spares no one. A person with a cold should be regarded as having a dangerous communicable disease, and we should know enough, and our children should be taught, to avoid him. Even among people who realize this, knowledge generally outruns practice, and on that account we get colds.

The trouble is that the vast majority of people do not regard the common cold seriously enough. If they, or their dear ones, contract tuberculosis, or are stricken down with pneumonia, they are seriously alarmed, but they overlook the fact that the common cold may be but the forewarning of these and other fatal diseases. "Oh, it's only a cold," they say, and before you know it, a shrewd observer finds the fact that the cold will quickly seize upon the weakest spot in the human body, whether it be the throat, the nose, the lungs, the heart, the kidneys, or elsewhere, and when at last realization comes that there is something seriously wrong it frequently is everlasting too late.

It is a good idea to let a doctor know if there are causing all the "stirring." It is also wise, ignorantly reposed as the little things that are responsible for most of the ill-health from which mankind suffers. Make no mistake about it, the common cold is no little thing although we may look upon it as such. Get after it the moment its first symptoms make their appearance. Better still, prevent it, those precautions necessary to prevent taking sick in the first instance.

Finally, if you can't or won't dodge the common cold, then at least don't make it necessary for your neighbor to dodge yours.

Rust Resistant Wheat

Wheat in Three Varieties
Should Be Available
Grade As High As the Best.

Within three years Western Canada should have a rust-resistant wheat which will grade as high as the varieties now being grown, according to L. H. Nelson, Dominion cerealist, who spent the past two weeks in the West, inspecting the work of the Dominion Rust Research Laboratory at the Manitoba Agricultural College and the various Dominion stations in the West and the West. He will also visit farms where rust-resistant grains are being produced for tractor equipment.

Moose Jaw As Convention City

Many Organizations Plan To Hold Annual Convention In Moose Jaw in 1929

The Saskatchewan Postmen's Association, the Saskatchewan Pharmacists' Association, the Saskatchewan Royal Merchants Association, the Saskatchewan Teachers' Association and the Saskatchewan Educational Association are among recent additions to the growing list of organizations that will hold their 1929 conventions in Moose Jaw.

Canadian Farmers Have Advantage

"Wheat farmers of Montana alone paid nearly \$8,000,000 more in freight rates on their wheat crops in 1927 than they would have paid had they been in Canada," said Senator Wheeler of Montana, speaking in the United States Senate recently.

Youthful Charms Enhanced By Cuticura

Soap and Ointment. Regular use of the Soap, assisted by the Ointment will keep the complexion clear, smooth and healthy. Cuticura Talcum is fragrant, cooling and refreshing, an ideal toilet powder.

"Postage Paid" Victoria, B.C. and Seattle,
"Postage Paid" Cuticura Shaving Stick & Soaps.

New Phone Service

Inauguration Of All Canadian Service Between Winnipeg and Montreal

Inaugurating the all-Canadian telephone service between Winnipeg, Toronto and Montreal, via Fort Arthur and Fort William, officials of the Bell Telephone Company and the Canadian National Railway and the Manitoba Government spoke to one another across 1,000 miles of copper wire recently. The new line between Winnipeg and Montreal has nine repeated amplifying stations. Its total weight is 350 tons.

A TIRED-OUT FEELING

Is a Sure Sign That the Blood Is Thin and Watery

"I am glad to have an opportunity of testifying to the benefits I derive from the use of Dr. Williams' Pink Pills," says Mrs. J. S. Kennedy, St. Joseph, N.S. She further says: "Some years ago I was badly run-down. I always had a tired-out feeling, had no appetite and was fatigued all day long. Almost every month I had to remain from the office for a day or two. I began to feel much better when I started taking Dr. Williams' Pink Pills, and I have reason to be glad that I followed this advice. Before long I began to feel much stronger. Continuing this regimen I am now well again. I am a woman of 60 years and have two fine healthy children, a girl and a boy, and am in the best of health. I am now taking Dr. Williams' Famous Pink Pills, and I trust that these few lines may help others in their troubles."

All weak, run-down people who will give this blood-building tonic a trial will be amazed at the results. You can get the pills from any druggist in town or by mail for 60 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Demand For Canadian Wheat

Believe That Demand From Orient Will Continue To Increase

Speaking at Shawinigan, Saturday, the other day, Frank W. Spence, director of the Shawinigan Wheat Pool expressed the belief that the Orient's demands for Canadian wheat, which last year were greater than ever before, will continue to increase.

He mentioned incidentally that the Saskatchewan Wheat Pool now has 925 country elevators and terminal elevators, 26,000,000 bushel capacity, while it is also building another facility of 6,000,000 capacity.

Nights Of Agony Come In The Trunk

and Sleepless Days In Bed

Saskatchewan implement firms record an increased volume of sales for this year, ranging from 25 to 100 per cent, over those at this time last year.

An encouraging feature, too, is that cash depositors, though this year are active in demand for farm implements, is also noted and a large portion of implements purchased such as plows, discs, etc., have been for tractor equipment.

Demand For Farm Implements

Saskatchewan Farmers Have Increased Sales

An encouraging feature, too, is that cash depositors, though this year are active in demand for farm imple-

ments, is also noted and a large portion of implements purchased such as plows, discs, etc., have been for tractor equipment.

Dog Fish Oil

New Industry Is Getting Under Way In British Columbia

The village fish traps along the Pacific Coast has at length found its niche in the scheme of economic usefulness, judging by a new industry getting under way at Vancouver. Dog Fish Oil is the basic product of the traps.

Using many mackerel, blackfish and other insect pests which most men and beast abhor. Several barrels a day of dog fish oil are being used in the manufacture of the pre-

paration of dog fish oil.

Muller's Worm Powders prove their value. They do not cause any violent pain or irritation, but do their work quietly and painlessly, so that the delicate system need not be disturbed. Yet they are thorough, and from the first dose there is improvement in the condition of the infant and cessation of manifestations of infantile trouble.

To Reconstruct Rolling Mills

Manitoba Rolling Mills To Operate Plant In Medicine Hat

The Medicine Hat City Council has received a proposal from the Manitoba Rolling Mills Company, of Winnipeg, that plans are in preparation for the reconstruction of the rolling mills in Medicine Hat, entailing the installation of an open hearth furnace and that the company is considering the use of electricity for the operation of the plant in preference to steam.

Parks Attract Foreign Tourists

Under present conditions of development and publicity, the national parks are not only rendering a wider service each year to Canadians themselves, but they are adding to the number of tourists from abroad and attracting to the Dominion thousands of visitors from other countries in every part of the globe.

Condensed Milk Production

Within recent years there has been a large increase in the production of condensed milk. The first milk condensery plant was established at Truro, Nova Scotia, in 1883, and there are now in Canada 28 plants for the manufacture of condensed and evaporated milk and milk powders.

Minard's Liniment cleanses cuts, etc.

The Family Rolling Stock

Farmers Of Western Canada Can Assist By Providing Winter Work

By G. BRADLEY

An experiment in colonization on a scale never before attempted is now in progress in Canada. Ten thousand men from the mining districts of England, driven almost to desperation by the attempt to maintain their families and to support their wives, have come to Canada to help with the harvest and to start life anew. If the opportunity to work after the harvest is in, is afforded the settlers, the experiment will be a success. The British and Canadian Governments have co-operated and in which the railway companies and steamship lines are also assisting. And while the need for harvest help has provided the opportunity to start life anew, the attempt, the real purpose in view is to settle, once and for all, that much-discussed problem of whether or not the British-born man is any longer a desirable settler for the west.

No one can estimate how far-reaching may be the effect of the success or failure of this experiment.

Failure may return the course of British immigration to Canada for years to come.

Success, on the other hand,

will bring a new hope and fresh endeavor to thousands of Britons who, unfortunately, are unable to find work in Canada, but who have been holding back because they believe they are not wanted here, because they do not believe there exists in Canada the opportunity to earn a living.

Success will give new hope and fresh endeavor to thousands of Britons who, unfortunately, are unable to find work in Canada, but who have been holding back because they believe they are not wanted here, because they do not believe there exists in Canada the opportunity to earn a living.

It was moved by Mr. Crown and seconded by Mr. Bell that the Board pay for one mile and a half of road to be dredged, Mr. F. McDonald to get in touch with Mr. Barker to have the work done.

The need of a shoemaker in the town was voiced and it was decided to get in touch with the C.N.R. Colonization Dept., Winnipeg.

Mr. G. W. Bell was appointed chairman of the next meeting.

C. E. Ferguson, engineer of the Calgary Power Company made a visit to Mirror Saturday and states that the right of way has been purchased by the Company, and surveying is now underway. It was also pointed out that the construction work was expected to start in any time during the month of October, doubtless we would have the power here within sixty days. A considerable number of houses are already wired up and others have been holding off till it was more certain of obtaining the power.

FOUND - a watch, apply to W. C. McCormack, Mirror

Public Approval

Six months' sales of Graham-Paige sixes and eights exceeded those of any twelve months in eighteen years. August - too, established a new all-time monthly sales record. We will continue to so manufacture each motor car that Graham-Paige may retain and increase this public approval. A car is at your disposal.
